

PERFUSION SERVICES

Procirca® has been a leading provider of cardiovascular perfusion services for more than 25 years. Our expertise in developing programs in heart centers of all sizes positions us as a leader in the clinical care environment.

PROVEN EXPERIENCE AND QUALITY

As a premier provider of comprehensive perfusion services, our skill, expertise, and continuing education promote the safety and satisfaction of our patients, as well as the peace of mind of our clients. Our clinical professionals average more than 10 years of hands-on experience.

Procirca has a history of excellence and innovation and is committed to providing solutions that benefit both our clients and their patients. Each year, our clients trust us to perform the following procedures:

Open heart surgery.....	4,100+
Autotransfusion.....	8,500+
Intra-aortic balloon.....	625+
Chemoperfusion.....	200+
Platelet gel.....	2,900+
Long-term ECMO/VAD.....	150+

COST-EFFECTIVENESS

Your biggest challenge is to deliver superior service while containing costs. Procirca's customized solutions account for both needs by:

- Developing a program that precisely meets your needs.
- Capitalizing on our extensive purchasing power and inventory optimization capabilities.
- Working with administration to optimize staffing.

OUR PERFUSION SERVICES

Our leadership and expertise will enable you to develop and maintain a world-class perfusion program. While our portfolio of services continues to grow to accommodate new technology and client requests, we currently offer the following services:

- Full-time and temporary staffing solutions
- Adult and pediatric cardiopulmonary bypass including minimally-invasive and robotic-assisted surgery
- Intra-aortic balloon pump (IABP)
- Extracorporeal membrane oxygenation (ECMO)
- Transplant support
- Aquapheresis
- Chemoperfusion
- Patient transport
- STS data management
- Program evaluation and development
- Ventricular assist device management
- Equipment and supply management

WHY CONSIDER CONTRACT PERFUSION SERVICES?

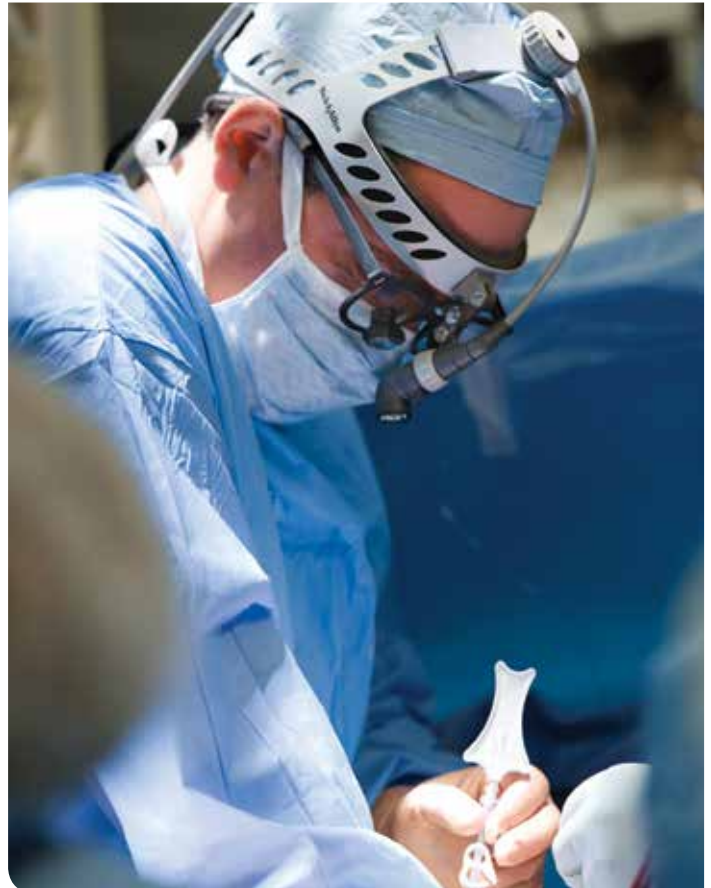

Today an increasing number of hospital administrators and surgeons are realizing the proven effectiveness of outsourcing their perfusion services. Procirca can build customized solutions that help our clients:

- Better manage operating and capital costs.
- Focus on core strengths.
- Optimize internal resources.
- Obtain access to world and industry best practices.

WHY CHOOSE PROCIRCA?

Procirca is uniquely positioned in our industry as the only health system-owned, contract cardiovascular perfusion services provider in the country. We learned the business in our own hospitals and truly understand your challenges. Our clients have selected Procirca because:

- Our perfusionists and autotransfusionists are employees who are experienced, insured and certified.
- We are AABB accredited and compliant with TJC standards.
- We have medical faculty who are experts in their clinical and academic disciplines.
- We offer an extensive perfusion scope of practice.
- We utilize state-of-the-art equipment from leading manufacturers.
- We provide current policies and procedures and advanced performance management tools to promote improved outcomes and patient safety.
- We administer our own School of Cardiovascular Perfusion and have access to the latest research, technology, and certified graduates.
- We provide comprehensive educational programs to our clients' perioperative staffs.
- We offer periApp™, our proprietary, web-based data management tool, which supports performance management, inventory, scheduling, and billing.
- Our complete, customized suite of services that can positively affect patients, staff and your bottom line.

ALWAYS HERE TO HELP

Procirca is available around the clock to provide on-site support for clinical events. We help hospitals from the inception of a new open heart program to those transitioning from an existing internal program or looking to replace their current outsourced provider.
