

Procirca Lends VAD Coordinators a Helping Hand

Procirca's team of highly experienced ventricular assist device (VAD) bioengineers and nurses can help manage some of the burden associated with running a VAD program. Procirca is knowledgeable about mandates established by the Joint Commission and has assisted programs with certification. Procirca strives to ensure that patients have access to the highest quality of VAD professionals whenever and wherever they need it. We are experts in more than one dozen mechanical circulatory support (MCS) technologies, and our team has more than 500 years of collective experience caring for more than 1200 MCS patients. Procirca offers affordable and customized services that will make your life easier, without reducing the quality of care your patients receive.

Procirca is backed by world-renowned clinical faculty specializing in congenital heart failure, adult and pediatric surgery, adult and pediatric extracorporeal membrane oxygenation, perfusion, perioperative blood management and clinical neurophysiology. We offer both on-site and on-call services.

Our on-site and on-call services include:

- Vacation coverage for VAD coordinator/team
- Clinical and technical coverage for periods of census fluctuation
- Coverage for FMLA/planned leaves of absence/military deployment/attrition
- Preparation for regulatory and accreditation requirements
- Clinical support and documented training for outpatient facilities and caregivers
- Documented training and competencies for new staff
- Implementation of new technologies
- 24/7 on-call phone coverage for inpatient and outpatient concerns
